Art. no. 3325 = Wall bracket for
dispenser x 2

Jede Xpress. The new generation.

The new Jede Xpress offers hot drinks for all tastes from a simple and attractively designed machine with a variety of modular options. There are over 30 different ingredient options in total, which you can choose to dispense to your individual taste, using plastic, paper or china cups. Alternatively you can use the Jede Hot Cup System (all ingredients portion con-

trolled, pre-packed in the cup and hygienically sealed in foil sleeves). No matter what alternative you choose there is always something to meet your requirements.

Jede Xpress is suitable for almost all environments. The simplicity makes it easy for both your staff and customers to appreciate a hot drink in seconds.

Choose from 30 different drinks

DEPTH: 320 mm
VOLTAGE: 230-240 V
POWER: 10 Amp external fuse
EFFECT: 1400 W
TANK: 6 l
ENERGY CONSUMPTION:
44,9 W acc. to EVA-EMP 1.0
COLOUR: black/silver

Jede Xpress offers 3 different systems:

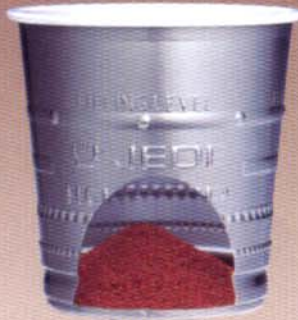

1 - Modular Design

The base machine comprises the Jede Xpress and two JM Dispensers for cartridges. With gentle pressure on the dispense button you can serve the beverage of your choice to exactly your own taste.

2 - HotCup

By simply changing the dispense module you can opt for the Hot Cup system. Hot Cup is a portion controlled pre-packed cup to which you add water. Suitable in public environments such as waiting areas, receptions etc. The system is very hygienic and simple to use.

3 - Frantass

This is a pre-packed portion controlled cup with a "seal" covering the product. The seal keeps the product fresh until it is removed before adding water. Hygienic and practical it is perfect for day trips and outings.
